📍 Abu Dhabi, UAE

Full Stack Developer who owns production systems end to end — React / Next.js and Vue frontends, Go / Node services, Supabase / PostgreSQL data layers, and Dockerized CI/CD on self-hosted infrastructure. Lead-level experience shipping reliable releases — rolling deploys, automated rollback, and code-review gates — and mentoring peers, with a low-level C / C++ foundation from 42 Abu Dhabi and a growing focus on agentic AI workflows.

EXPERIENCE

Suportech Embedded

Apr 2026 — Present

Embedded Software Developer · Part-time

- Developing desktop software in **Python** (PyQt5 front end, Flask backend) with automated **CI/CD** release delivery.
- Implemented data security with **envelope encryption (DEK / KEK)** to protect sensitive data at rest.
- Built an application updater with a **CI/CD pipeline** that publishes versioned executables to a registry for automated rollout.
- Authoring **unit tests** on GitHub Actions (windows-latest) runners, with changes gated by code review before merging to dev.

Ratchet Capital

Apr 2024 — Apr 2026

Full Stack Developer · Abu Dhabi, UAE · Full-time

- Shipped through a code-review-gated Git workflow — feature branches reviewed before merging to **dev**, with weekly **dev** → **main** production releases.
- Megastars.ai v2** Next.js · Supabase · TypeScript · Cloudflare
 - Delivered full-stack features for a production influencer-marketing platform serving **500+ active influencers** at **99.9% uptime** and 10K+ daily auth requests.
 - Configured multi-provider OAuth (Instagram / TikTok / YouTube), built dashboard features, and improved landing-page SEO.
- Influenz — Megastars.ai v1** Tech Lead Vue · Gin (Go) · Node · PostgreSQL · Docker
 - Led a 4-developer team architecting a **4-service Dockerized microservices** platform behind Nginx — Vue / Vite frontend, Gin (Go) API, a dedicated Node OAuth 2.0 / identity service, and PostgreSQL.
 - Standardized environments with separate **dev** and **prod Docker Compose** stacks driven from a root Makefile, sharing inherited service definitions for DRY config and clean separation of concerns.
 - Provisioned **staging and production DigitalOcean droplets** on self-hosted Linux GitHub Actions runners, with a rolling-deploy workflow and automated rollback.
- Verif-y** Frontend Developer React Native · Expo · TypeScript
 - Built a cross-platform iOS / Android document-verification app with canvas signature capture and skeleton loading — **~60% faster** verification flow.
- ioMega Energy** Solo Eleventy · SASS · Docker · Nginx · GSAP
 - Designed and shipped a production SEO site scoring **95+ Lighthouse** with a 60% CSS reduction and sub-2.1s loads; zero-downtime rolling deploys via GitHub Actions.
- Trescudo** Solo Eleventy · Nunjucks · Docker · Nginx
 - Built a cybersecurity marketing site at **98 performance** score — 85% image-size reduction (WebP) and sub-100ms response times.

SELECTED PROJECTS

Jarvis

SwiftUI · Node · llama.cpp · Whisper

Native macOS agentic LLM orchestration layer — dual-tier local + cloud inference at 42 tok/s on an 18 GB budget, with voice-to-text and terminal command execution.

Cormonity

Next.js · Cloudflare Workers · Redis

Distributed edge platform engineered for high-concurrency, ultra-low-latency state distribution with resilient global edge routing.

Jellybean PM

Astro · GitHub Issues API · TypeScript

GitHub-Issues-powered project-management integration for Astro — drag-and-drop Kanban, sprint planning, milestones, and real-time chat with no external database or SaaS.

42 COMMON CORE PROJECTS

- ft_transcendence** — full-stack multiplayer web app Nuxt.js · Nest.js · PostgreSQL · Docker
- minishell** — Unix command interpreter: parsing, pipes, redirections c
- ft_irc** — RFC-compliant IRC server, socket programming c++

MENTORING & COMMUNITY

Student Tutor

Aug 2022 — Present

Mentor peers on build systems (Makefiles) and memory-management practices at 42 Abu Dhabi.

SKILLS

LANGUAGES

TypeScript · Go · C / C++ · Python · SQL

FRONTEND

React · Next.js · Vue / Nuxt · Tailwind · GSAP

BACKEND

Node / Express · Gin · Flask · Supabase · PostgreSQL · REST · OAuth 2.0

DEVOPS

Docker · GitHub Actions (self-hosted runners) · DigitalOcean · Nginx · Cloudflare · Rolling deploys & rollback

EMBEDDED / DESKTOP

Python · PyQt5 · Flask · DEK / KEK encryption · Unit testing

AI

Claude Code · Agentic workflows · Local LLMs · Prompt engineering

STRENGTHS

Technical leadership · Mentoring · Ownership · Communication · Pragmatic problem-solving · Adaptability · Cross-team collaboration · Attention to detail · Continuous learning

EDUCATION

42 Abu Dhabi

Software Engineering — Common Core

2021 — 2023

Peer-to-peer, project-based curriculum: low-level C / C++, Unix systems, concurrency, networking, algorithms, and DevOps.

ACHIEVEMENTS

◆ 42 Common Core Certification

42 Abu Dhabi · Nov 2023

◆ AgentEra AI Hackathon

MOEI × 42 Abu Dhabi — Certificate of Appreciation

LANGUAGES

English	Native
Afrikaans	Native
Spanish	Beginner
